

Validation & Research Summary Dashboard

Executive Summary

This summary aggregates validation metrics for symbol **EURUSD** on timeframe **H1**. Following walk-forward testing, random execution cost disturbances, sequence bootstrapping, and sensitivity plateaus, the validation suite assigns a recommendation status of **NEEDS IMPROVEMENT**.

Quality Scorecard

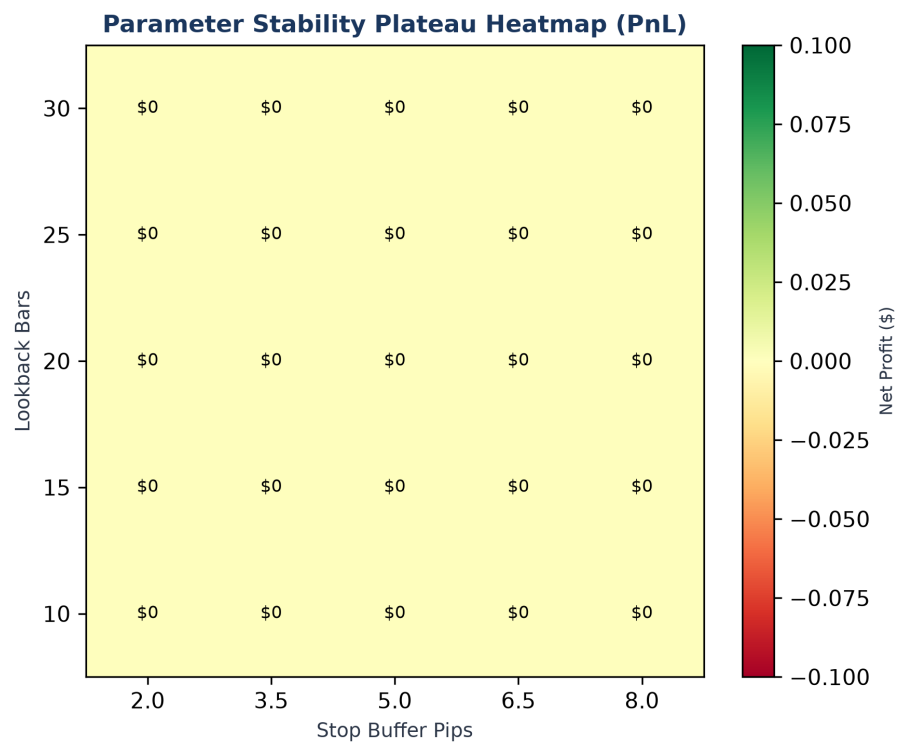

Quality Area	Score
Overall Score	50.0/100
Risk Score	100.0/100
Robustness Score	0.0/100
Optimization Score	N/A
Walk Forward Score	0.0/100
Monte Carlo Score	100.0/100

Validation Modules Status

Module	Status	Diagnostic / Result summary
Walk Forward	SUCCESS	Successfully completed 2 validation folds.
Parameter Optimization	SUCCESS	Optimal Parameters: RR=1.0, StopBuffer=3.0
Monte Carlo	SUCCESS	Expected return: \$0.00, Ruin risk: 0.0%
Robustness Stress Testing	SUCCESS	Baseline PnL: \$0.00, Stress Slippage PnL: \$0.00
Parameter Stability	SUCCESS	Stability matrix heatmaps generated successfully.
