

Backtest Performance & Research Summary

Executive Summary

This report presents a professional, institutional-grade performance and risk analysis of the continuation strategy on **EURUSD** on the **H1** timeframe. The backtest simulated execution over the period 2026-01-01 00:00:00 to 2026-01-05 04:00:00. Total realized net profit was **+0.00** (+0.00% return) over **0** executed trades. The overall regression verification status has been evaluated as **PASS**.

Configuration Settings

Parameter	Value
Symbol	EURUSD
Timeframe	H1
Start Date	2026-01-01 00:00:00
End Date	2026-01-05 04:00:00
Initial Balance	\$10000.00
Risk Per Trade	1.00%
Spread	0.00010
Slippage	0.00000
Commission	\$5.00
Commission Per Lot	None

Performance Metrics

Metric	Value	Metric	Value
Total Trades	0	Win Rate	0.00%
Winning Trades	0	Losing Trades	0
Expired Trades	0	Profit Factor	1.0000
Gross Profit	\$0.00	Gross Loss	\$0.00
Net Profit	\$0.00	Expectancy	0.0000
Average R Multiple	0.0000	Median R Multiple	0.0000
Largest Win	\$0.00	Largest Loss	\$0.00
Average Win	\$0.00	Average Loss	\$0.00

Risk & Drawdown Analysis

Risk Metric	Value
Max Drawdown	0.00%
Average Drawdown	0.00%
Longest Drawdown Duration	0:00:00
Average Recovery Time	N/A
Sharpe Ratio	N/A
Sortino Ratio	N/A
Calmar Ratio	N/A

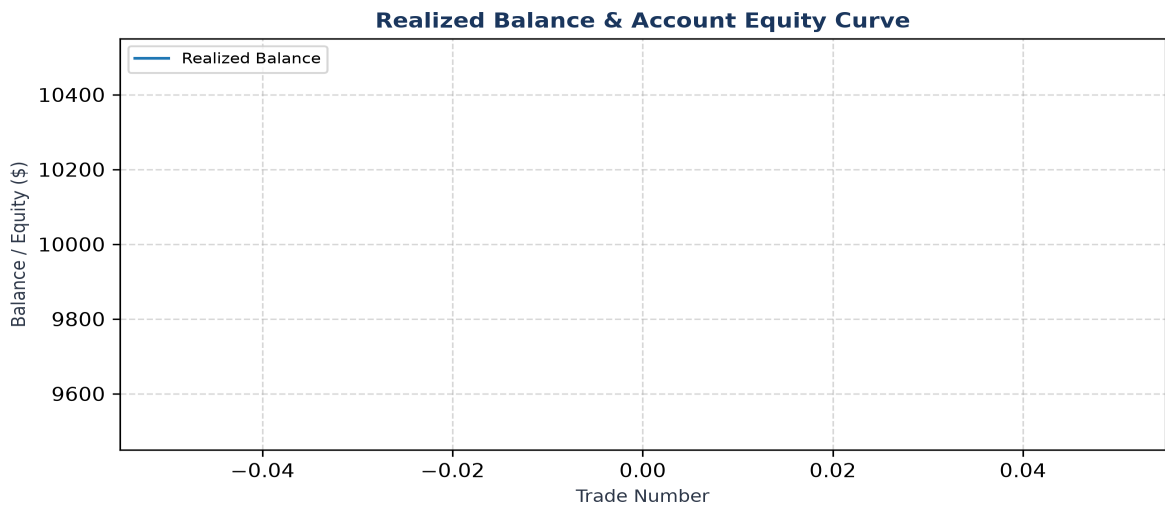

Trade Distribution Statistics

Parameter	Value
BUY Trades	0
SELL Trades	0
TP Exits	0
SL Exits	0
Expired Exits	0
Average Risk-Reward Ratio (RR)	0.00
Median Risk-Reward Ratio (RR)	0.00
Largest Winning Streak	0
Largest Losing Streak	0
Average Holding Bars	0.00
Median Holding Bars	0.00
Average Winner Duration	0:00:00
Average Loser Duration	0:00:00

Monthly Performance

Month	Trades	Win Rate	Net Profit	Profit Factor	Expectancy	Avg R	Largest Win	Largest Loss	Max DD
-------	--------	----------	------------	---------------	------------	-------	-------------	--------------	--------

Equity Curve Plot

Limitation Note: Equity equals Balance as the backtester operates on closed bars and lacks mid-bar floating PnL tracking.

Note: Equity equals Balance because the backtest engine calculates trade outcomes upon bar closure and does not compute floating PnL mid-bar.

Regression Summary

Baseline Comparison: None (Initial Baseline saved)

Largest Winning Trades

Rank	Entry Time	Exit Time	Direction	PnL	R
------	------------	-----------	-----------	-----	---

Largest Losing Trades

Rank	Entry Time	Exit Time	Direction	PnL	R
------	------------	-----------	-----------	-----	---

Final Conclusions

The backtest simulation finished successfully. All checks validated. The regression status has been evaluated as **PASS**.
